

e^N-Check 3000

Dial check reader

Expressly designed to put an end to check fraud, the e^N-Check 3000 is a comprehensive, fast and simple-to-use check reader. The e^N-Check 3000 not only excels at a variety of applications including check authorization, verification, guarantee, and electronic check (POP) processing—but it is proven to be the most cost-effective and versatile check reader on the market! Just as important, it is brought to you by the company with more check readers installed worldwide than any other company. Ingenico.

You may choose from one of the following services:

eGold will convert (electronically transfer the check directly into your checking account), verify (make sure the check is valid) and guaranty the check.

eSilver will convert (electronically transfer the check directly into your checking account), verify (make sure the check is valid). Essentially the same as eGold but without guaranty.

IMPORTANT: e^N-Check 3000 is a stand alone check reader that requires a Printer 250 (Veriphone)
